

REMEDIATION AND RECLAMATION

ENERGY ENVIRONMENTAL CONSULTING works closely with the appropriate regulatory agencies to provide remediation and reclamation services. Our experience includes a broad array of projects ranging from well closure activities to contaminated soils remediation. We work with the agencies to ensure project approval and timely closure.

Contaminated soils and pit closures:

- Obtain agency approvals for proposed work
- Contaminated soil sampling and evaluation
- Determine extent of contamination
- Removal and disposal or treatment of contaminated soils
- Obtain clean closure

Reclamation:

- Reclamation following contaminated soils removal and remediation
- Reclamation following pit closure activities
- Well pad and access road reclamation
- Reservoir reclamation

Your company has a plan to succeed and we can help you get there.
