

INTRODUCTION

ENERGY ENVIRONMENTAL CONSULTING is an experienced environmental consulting firm providing assistance and guidance to the energy industry. We are established environmental and industry professionals who know how to effectively plan, manage, and complete projects of all scope and size.

IEEC is focused on understanding the regulations and issues affecting the natural resource industry. We are motivated by our clients' goals and objectives and our commitment to provide quality services and products.

We can work with your company in any capacity, by providing technical assistance to your staff or through complete project management. We have the regulatory knowledge and resources necessary to efficiently complete projects and achieve optimal results.

IEEC provides the following services:

- Air quality permitting
- Civil engineering
- Database management
- Environmental compliance
- Environmental site assessments
- Geology and soils
- Mapping and as-built drawings
- Reclamation
- Remediation and pit closures
- Surface and groundwater hydrology
- Training
- Water management

Your company has a plan to succeed and we can help you get there.
