

## **WATER MANAGEMENT**

**ENERGY ENVIRONMENTAL CONSULTING** has extensive experience in water management including planning, permitting, compliance monitoring and reporting. Our water management expertise encompasses all aspects of NPDES requirements, reservoir permitting, and preparation of water management plans. Our understanding of current regulations combined with working relationships with regulatory agencies provide for a seamless process from project development to implementation.

### **NPDES and state discharge permits:**

- Permit applications and modifications
- Sampling and monitoring
- Discharge monitoring reports

### **Reservoirs:**

- Siting and design
- Permitting
- Bonding
- Monitoring
- Construction supervision
- Maintenance inspections

### **Water Management Plans:**

- SEO, DEQ, BLM Permitting
- Integration of disposal options
- Monitoring compliance plans
- Reservoir design for SW3, SW4 and off-channel pits in Wyoming
- Storm Water Pollution Prevention Plans (SWPPP) and associated monitoring

*Your company has a plan to succeed and we can help you get there.*
